

Rating a Website

Note: you can check a website from anywhere by going to <http://cfssupport.sonicwall.com> and following this guide.

Step 1: When a site is blocked you can try and rate it by clicking the here link as shown below.

Step 2: Enter the URL you wish to rate. This page will sometimes have a captcha on it to prove your human.

Enter the URL you wish to view the rating for:

Step 3: It will tell you how the site is rated. Click Rating request to rate the site.

Enter the URL you wish to view the rating for:

The URL <http://www.example.com> is currently rated as:

Category 64: Not Rated

To request a URL be rated, or re-rated, please submit a [Rating Request](#)

Step 4: Fill out this form and in less than 3 days the site should be unblocked

This page is used to submit requests to have the rating of a URL in the SonicWall CFS database reevaluated, or to have a previously unknown URL rated, and added to the CFS database.

When a request is submitted, the SonicWall CFS team will evaluate the rating of the page, and if necessary will change or add the rating in the CFS database.

Please enter the URL that you wish to have rated/reviewed:	<input type="text" value="http:// www.example.com"/>
<i>Please note:</i> If submitting a URL that was blocked, please use the exact url from the Block page, or the SonicWall log.	
Please enter your E-mail address:	<input type="text"/>
How should this URL be categorized?	<input type="text" value="-- Please Choose a Category --"/>
Please briefly explain why you would like to have this URL rated/reviewed.	<input type="text"/>
